

Small size,  
big choices.

MiniPet™

The world's best selling micropipette has a lively new look. Compact and engineered for precision, the sturdy MiniPet air-displacement micropipette comes in a range of volumes

and now offers custom color variations. Add your name and logo or custom packaging to the MiniPet to make an eye-catching addition to a diagnostic kit.

 **TRICONTINENT™**  
HANDLING LIQUIDS...PRECISELY

## Functional

The MiniPet is designed to handle thousands of pipettings using generic disposable air displacement tips. Available in volumes that range from 5 to 200 $\mu$ L, the MiniPet provides precision, accuracy, and affordability for routine applications. Durable molded plastic stands up to the rigors of the lab, assuring accurate measurements. Precision and accuracy specifications vary depending on the volume dispensed, however are comparable or better to the more expensive pipettes.

## Stylish

When we first introduced the colorful MiniPet at a trade show, it created quite a stir. While most MiniPets come in a standard beige or gray, the range of color options is limited only by your imagination. Simply supply us with a color sample or PMS number. Combined with custom pad printing of your company logo, name, or other message, the MiniPet is a vivid addition to diagnostic kits and other applications.

## Versatile

The MiniPet is available to retail customers as well as OEM customers in quantities of 1000 or more. Orders can be packaged in bulk or in custom packaging that you designate. The MiniPet is offered separately or with disposable tips. Options include a detipper bottle for convenient tip disposal.

“...a memorable  
addition to a  
diagnostic kit.”
